No.	Code	Definitions
		the Amman Stock Exchange (ASE) classifies the market into two categories that differ in terms of their listing requirements. Before 2017, the ASE classified the market into three categories that had different listing requirements. The code 0 means that the financial security is not listed on the market, code 1 means that the financial security is listed on the first market, and code 2 means that the financial security is listed on the second market. (To review listing requirements, you may refer to the accompanying listing regulations).
17	Market_Index_Free_Float	Market Index- Free Float: In the free float weighted Index, stocks carry weight relative to their market capitalization after excluding closely held stocks (shares owned by the board of directors, investors who owned more than 5% and any government ownership).
